

Workshop

The SmartGeometry workshop is an annual event which attracts an impressive array of tutors and attendees from across the worlds of academia and professional practice as well as many of the brightest students. The workshop is open to 100 applicants who come together for four days of intensive design and collaboration.

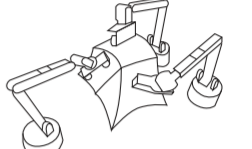

SG2010 workshop in Barcelona is organised around the challenge **Working Prototypes**. Attendees are challenged to design, assemble and test working prototypes.

The workshop is composed of ten clusters. Clusters are hubs of people, expertise and machinery. Each Cluster is championed by two tutors who are pioneers in their field.

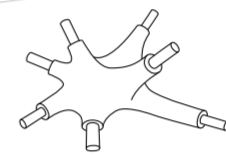

Clusters

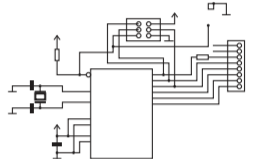

Deep Surfaces

Curved Folding

Nonlinear Systems
Biology and Design

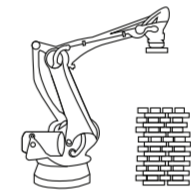

Parametrics and
Physical Interactions

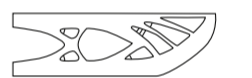

Manufacturing
Parametric
Acoustic Surfaces

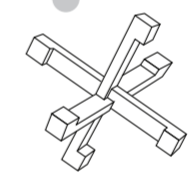

High Tech Design/
Low Tech
Construction

Explicit Bricks

Design to
Destruction

Rapid R&D to
Rapid Assembly
